In order to establish and maintain a safe working and learning environment for students, staff and other members of the College community, the College will develop and maintain a health and safety program for its campuses and centers. The program will include, but not be limited to, security and emergency response procedures, workplace safety and accident prevention programs, and facility maintenance and pest control procedures, systems and processes. All employees of the College are responsible for understanding health and safety-related policies, procedures and practices, participating in required safety training, and for reporting unsafe situations to designated College officers.

**Delegation of Authority**

The Administration will establish regulations and procedures to implement this policy.
